

# DAVIS TECHNICAL COLLEGE ADMISSION ASSESSMENTS

To enroll in a Davis Technical College program, students must meet designated admission requirements. These requirements are set at the skill level needed to be successful in the program.

Admissions requirements are evaluated in the college's [assessment center](#). Requirements may be met by completing tests on campus or by bringing external documentation. Student Services staff will help you determine if your documentation meets the admissions requirements for your desired program.

**If you chose to complete the TABE, no external documentation is required. Note:** Admissions testing for all programs is waived for students with a Davis Tech Certificate of Completion at an equivalent level or higher or an associate's degree or higher from a regionally accredited college.

Assessment levels are provided on this table; additional information about each level is provided on the next page.
